DOORS ARE THE FOCAL POINT OF **EVERY** PROPERTY

Our comprehensive range of custom doors offers a solution for everyone. From quality doors for your home to sophisticated, grand entrances.

GAVA WITH SASH OVERLAP

 Overlapping panel indicator

The panel overlaps the profile

Overlapping panels are the ideal choice for sophisticated clients who want to highlight the unique design and elegance of their entrance doors.

Aluminum doors
AL and W door panels

Plastic doors
AL, W, or HPL door panels

GAVA WITHOUT SASH OVERLAP

 Insert panel indicator

Panel with exposed profile

A standard solution used on most entrance doors.

Aluminum doors
AL or HPL door panels

Plastic doors
HPL door panels

ALL PANELS CAN BE MADE IN BOTH STYLES

X-SYSTEM

Experience the elegance of overlapped panels even on plastic doors

- ✓ Allows overlap of HPL types
- ✓ An affordable solution for overlays
- ✓ Developed for plastic systems

SCAN ME

Learn more about the X-system here

REMOVABILITY

X-system allows easy removal of the panel, greatly simplifying service.

INDEPENDENCE FROM THE LEAF

The panel is not glued, which reduces thermal expansion and allows better door functionality.

SAFETY

X-system offers the same level of safety as traditional door panels.

AFFORDABLE PRICE

X-system is more cost-effective compared to other overlay solutions.

TECHNOLOGY OF A NEW LEVEL

We test new products under extreme conditions to confirm the accuracy of our designs and offer you the quality you deserve.

- ✓ X-system absorbs expansion forces exerted on the door
- ✓ Does not transfer forces to the leaf, extending the door's lifespan
- ✓ Allows replacement without damaging the leaf
- ✓ Drastically increases space for thermal insulation in doors

DESIGN

TEST

REFINE

Photographed in our laboratory
Our "artificial sun" heats the surface of the panel up to 90 degrees Celsius
